Professional Summary

Full Stack Developer with 6 months of industry experience, skilled in **HTML5, CSS3, JavaScript, React.js, PHP, Laravel, Node.js, and REST APIs**. Experienced in developing responsive web applications, authentication systems, admin dashboards, AI-powered features, email integrations, and deploying applications using Railway, Vercel, and Render. Hands-on experience with **MongoDB, PostgreSQL, Redis, Laravel Queues, and Horizon**, with a strong understanding of production-level planning, development, testing, and deployment.

Professional Experience

Web Developer Intern — Enjay IT Solutions Ltd.

Feb 2026 to Aug 2026

6-Month Internship

- Built an AI-powered helpdesk platform that automatically converts customer emails into support tickets using **IMAP integration** and manages the complete ticket lifecycle.
- Integrated **Google Gemini AI** for ticket classification, priority detection, sentiment analysis, and AI-generated reply suggestions.
- Developed **role-based Admin and Agent dashboards** with ticket filtering and tracking, and deployed the application using **Docker, PostgreSQL, and Railway**.

Projects

AI-Powered Helpdesk & Ticket Management System | [Live Demo](#) | { Github [Link](#) }

Laravel 12, PHP, PostgreSQL, Gemini AI, Tailwind CSS, Docker

- Built an AI-powered helpdesk platform that automatically converts customer emails into support tickets using IMAP integration.
- Integrated Google Gemini AI for ticket classification, priority detection, sentiment analysis, and AI-generated reply suggestions.
- Developed role-based Admin and Agent dashboards with ticket tracking, filtering, and lifecycle management.
- Deployed the application using Docker and Railway with PostgreSQL, SMTP email delivery, and automated background processes.

MyCart MERN Ecommerce | [Live Demo](#)

React.js, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack e-commerce application with **product management, cart, checkout, order tracking, and authentication** features using React.js, Node.js, Express.js, and MongoDB.
- Implemented **JWT-based authentication and role-based access control** for Admin and Customer workflows, including a dedicated admin dashboard.
- Deployed the application using **Vercel, Render, and MongoDB Atlas**, with email notification integration and real-time order status updates.
